

The HECAT "Pulsator" FAC-400

Recycling A/C Component Flusher

HECAT's top of the line, Internal Recycling Pulsator FAC-400, featuring the Patented (US Pat #5615695), Impacting, Air Operated, Pulsating, and Scrubbing Action.

Slightly larger flow paths than any other Pulsator provides for rapid cleaning and internal solvent recycling with just the flip of a valve.

Meets current Raytheon-King Air specifications for Aircraft A/C repair and combined with the FAD-100 Adapter Kit, is a required tool for Ryder Transportation Services.

- 2-gallon capacity, with easy to obtain automotive oil filters (2) for recycling.
- Recycling feature allows for multi-pass operation using only shop air.
- Solvent mist separator and Activated Carbon vent filter to limit fumes.
- Removable return line for waste oil purge, aids in extending the life of the flush.
- High volume air purge removes the residual solvents and dries the component
- Cleanable return line tee strainer to capture larger debris.
- Many commercial A/C flushes have been approved for use, see web site for list.
- 39 in. high X 23 in. wide X 16 in. deep.
- Ships by truck, boxed and skidded weight is 120 lbs.

Includes: 2 gallons of HECAT Safe-Flush A/C.

Adapters Required: HECAT FAD-100 is recommended.

Lifetime Warranty with exclusive use of HECAT Safe-Flush A/C.
