

# The HECAT "Pulsator" Mark IV

## Recycling Transmission Oil Cooler Flusher

HECAT's top of the line, Internal Recycling Pulsator Mark IV, featuring the Patented (US Pat #5615695), Impacting, Air Operated, Pulsating, and Scrubbing Action.

Slightly larger flow paths than any other Pulsator provides for rapid cleaning and internal solvent recycling with just the flip of a valve. Ease of use, effectiveness, and the ability to go from car to car to car has made this a very popular tool with the larger volume and franchise chain repair shops.

Removable return line feature allows for cooler waste oil purge, which aids in extending the recyclable life of the flushing fluid. Separate, high volume air purge feature removes the solvent and dries the cooler in minutes.

- 2-gallon capacity, with easy to obtain automotive oil filters (2) for recycling.
- Recycling feature allows for multi-pass operation using only shop air.
- Solvent mist separator and Activated Carbon vent filter to limit fumes.
- 39 in. high X 23 in. wide X 16 in. deep.
- Cleanable return line Tee strainer to capture larger debris.
- Cooler flow verification is completed during the flushing process.
- Ships by truck, boxed and skidded weight is 120 lbs.

**Includes: The HECAT BASIC Transmission Cooler & Line Adapter Kit and 2 gallons of HECAT Safe-Flush Trans.**

**Lifetime Warranty with exclusive use of HECAT Safe-Flush Trans.**
