

HECAT Safe-Flush Trans

Transmission Oil Cooler Flush

The most common fluid used to flush a transmission cooler circuit with Hecat's Pulsating Flushers has been Mineral Spirits and other similar White Solvents (Varsol, etc.). If you are **NOT** facing restrictions on its use where you live then it is still an acceptable and approved flush for use in any model of the Hecat "Pulsating" Flushers.

The California Air Research Board has identified Mineral Spirits as an excessive VOC emitter. Hecat developed Safe-Flush Trans to address this hazard to the health of automobile technicians. After extensive testing with many different compounds we have found the formula of Hecat Safe-Flush Trans combined with our Patented "Pulsating" Flusher, has the highest cleaning qualities without all the hazards of many other solvents used in the industry. Hecat Safe-Flush Trans is CARB compliant and tested with our "Pulsating" Flushers through the activated carbon vent filter, does not exceed California VOC emission standards.

- Available by the case (4-1 gal.).
- Includes 2 **FREE** filters (used on the Mark III and Mark IV Flusher models).
- Ships UPS Ground (31 lbs)
- DOT classification - not regulated.
- Operator safe & friendly.
- Breaks down waxy (paraffin) deposits.
- Breaks down varnishes.
- No noxious fumes or odors.
- No need for special ventilation.
- Miscible (blends) with all transmission fluids so any minor trace residue will fully dissipate into the system without any harm.
- Tested to be compatible with all common transmission materials.
- Easily disposed of with waste oils.
- **LIFETIME WARRANTY** is available on any model Hecat Pulsating Flusher with exclusive use of Safe-Flush Trans.

Note: If you wish to use Mineral Spirits and other similar and acceptable White Solvents (Varsol, etc.), a one year warranty will apply. If you have any questions about flush chemicals contact HECAT, Inc. at 1-800-380-9501. It is the Technician's responsibility to research and follow local, state, and federal regulations in regards to the flush chosen for use and the disposal of the used flush and its original containers. Because conditions of use are outside of HECAT's control, we can assume no liability for results obtained or any damages that occur from the use of this product. MSDS is available upon request.
